

Digital Fingerprint Solution Highlights

- Installed 15,000 live scan devices throughout the United States and in countries around the world
- Selected as the preferred provider by law enforcement, border control, military and commercial agencies
- Supported identity solutions programs for over twenty years

Agile TP™

Fast Digital Fingerprint Processing

Fingerprint capture made fast and easy for busy entry-exit stations or applicant processing where people need to get processed quickly with reliable results.

The Agile TP is a lightweight, easy-to-use digital fingerprinting device that is ideal for civil programs at border control checkpoints, airports or other security terminals as well as background checks at job application centers.

With a self-directed user interface to assist subjects, a full set of flat fingerprints can be captured in less than 10 seconds. Compact and portable, the Agile TP is easy to install and start-up with a standard USB-2.0 interface.

RELIABLE IN HIGH VOLUME APPLICATIONS

Most civil identification programs have high throughputs with long lines of people requiring fingerprint capture. With no moving parts in the optics deck and no silicon pads to change or replace, the Agile TP ensures maximum uptime delivering reliable results over and over again.

FAST AND EASY CAPTURE

Our unique graphical user interface (GUI) is easy to understand and instructs subjects in proper finger placement to improve processing times.

PROVEN TECHNOLOGY FOR QUALITY FINGERPRINT IMAGES

Our advanced technologies automatically capture more data and better data, such as fine minutiae and ridge detail in all fingerprint types, thereby reducing variability and the need for recaptures which lead to processing delays.

It delivers the same revolutionary capabilities found in the TouchPrint live scan product portfolio in a compact unit.

Fingerprint images are captured in seconds, not minutes. It is ideal for semiattended or unattended environments where the subject is a novice live scan user.

Agile TP™ Specifications*

Model Number	TP-4101
Weight (nominal)	1.8kg (4.0 lb.)
Dimensions (H x W x D)	4.9 x 6.0 x 6.0 in (125 x 152 x 152 mm)
Platen Active Area (H x V)	3.2 x 3.0 in (81.2 x 76.2 mm)
Scan Resolution	500 ppi image capture output
Scan Rate (frames/sec)	>4 frames/sec continuous image capture
Image Quality	Exceeds FBI IQS IAFIS Image Quality Specification Appendix F
Auto-fingerprint capture	Supports 4 finger slap and dual thumb capture with NIST quality checks
Interface	Single USB 2.0 (standard cable) supporting both data and power
Operating Environment	Ambient Temperature 0° - 50° C, (32° - 122° F)
Humidity	10% - 90% non condensing
User Interface	Easy-to-understand GUI for simplified operation
Options	Carrying handle for easy transporting Mounting base for security and to prevent theft
Warranty	One year limited warranty
Maintenance and Support	Range of support packages available
Certifications	FBI certified (as TouchPrint™ 4101), PIV approved, RoHS compliant, TUV testing for CE compliance, IP54 certified for shock & durability, STQC & UIDAI certified
